

Bibliography

FOR GENETICS AND PSYCHIATRY

This section contains a compilation of recent publications that have shaped the thinking in the field as well as classic works that remain important to the subject reviewed in this issue. This bibliography has been compiled by experts in the field and members of the editorial and advisory boards. Entries are listed chronologically. Articles from the bibliography that are reprinted in this issue are in bold type.

Craddock N, O'Donovan MC, Owen MJ: Genes for schizophrenia and bipolar disorder? Implications for psychiatric nosology. *Schizophr Bull* 2006; 32:9–16
