*The American Psychiatric Association (APA) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide Continuing Medical Education for physicians.

The APA designates the 2024 Annual Meeting On Demand Product for *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

New!

Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition, Text Revision (DSM-5-TR™)

American Psychiatric Association

The *Diagnostic and Statistical Manual of Mental Disorders*, Fifth Edition, Text Revision (DSM-5-TR), is the most comprehensive, current, and critical resource for clinical practice available to today's mental health clinicians and researchers. DSM-5-TR includes the fully revised text and references, updated diagnostic criteria and ICD-10-CM codes since DSM-5 was published in 2013. It features a new disorder, Prolonged Grief Disorder, as well as codes for suicidal behavior available to all clinicians of any discipline without the requirement of any other diagnosis.

With contributions from over 200 subject matter experts, this updated volume boasts the most current text updates based on the scientific literature. Now in four-color and with the ability to authenticate each printed copy, DSM-5-TR provides a cohesive, updated presentation of criteria, diagnostic codes, and text. This latest volume offers a common language for clinicians involved in the diagnosis and study of mental disorders and facilitates an objective assessment

of symptom presentations across a variety of clinical settings—inpatient, outpatient, partial hospital, consultation-liaison, clinical, private practice, and primary care.

The Pocket Guide to the DSM-5-TR® Diagnostic Exam

Abraham M. Nussbaum, M.D., M.T.S.

This book is the clinician's companion for using *DSM-5-TR™* in diagnostic interviews. Beginning with an introduction to the diagnostic interview, the *Pocket Guide* addresses the goals of the interview, provides an efficient structure for learning how to conduct one, reviews the screening questions, and then

explains the ways in which *DSM-5-TR™* impacts the interview.

The American Psychiatric Association Practice Guideline for the Treatment of Patients with Eating Disorders, Fourth Edition

American Psychiatric Association

The guideline focuses on evidence-based pharmacological, psychotherapeutic, and other nonpharmacological treatments for eating disorders, primarily anorexia nervosa, bulimia nervosa, and binge-eating disorder. In addition to statements related to assessment and treatment planning, the guideline provides direction on implementing these recommendations into clinical practice.

DSM-5-TR[®] Clinical Cases

Edited by John W. Barnhill, M.D.

DSM-5-TR Clinical Cases clarifies and discusses psychiatric diagnosis with a particular focus on how diagnoses have evolved from DSM-5. This book presents a broad range of patient vignettes that cover the diagnostic waterfront. Each of the 104 cases is followed by a discussion by an expert clinician, who describes an approach to diagnosis through an exploration of psychiatric and personal history, symptom clusters, laboratory tests, and clinical ambiguities.

2023 • 416 pages • ISBN 978-1-61537-361-1 • Paperback • \$92.00 • Item #37361

The Psychiatry Resident Handbook How to Thrive in Training

Edited by Sallie G. De Golia, M.D., M.P.H., and Raziya Wang, M.D.

This guide deftly combines the wisdom of seasoned leaders in psychiatry residency and fellowship with the perspectives of current residents-in-training to deliver a holistic approach for making the most of the training years. Issues of identity, clinical practice, skill-building, career development, and balancing work and a personal life all are addressed in chapters that apply the information to real-life scenarios and encourage self-awareness and professional identity development.

Sleep disturbance often precedes the onset of autism characteristics in early childhood. In their article, Annette Estes, Ph.D., and colleagues highlight the importance of good sleep hygiene and how to optimize success when addressing sleep disruption in autistic children.
